

E-FILING SYSTEM

Political Disclosure Documents - FPPC 460
Admin Tool & Public Viewing via the Web

E-FILING SOLUTION

Create your own internet based electronic filing system for the Form 460

THREE MAIN COMPONENTS

1. *Electronic filing*

- Each filer issued Filer ID and secure password
- Link from your website starts the filing process
- Site is hosted by NetFile but looks just like your site
- Our servers insure efficient and fast filings
- Filer can either save their data input or enter all the data at once and file
- Submitted filing is sent to our servers for validation
- Immediate validation notifies pass or fail
- Filings that pass receive unique identifier
- Filer instructed to print and sign a paper copy for submission to the Agency
- No more messy reports!

Easy to use interface. Both administration and filing are simple and user-friendly!

2. *Public viewing on internet*

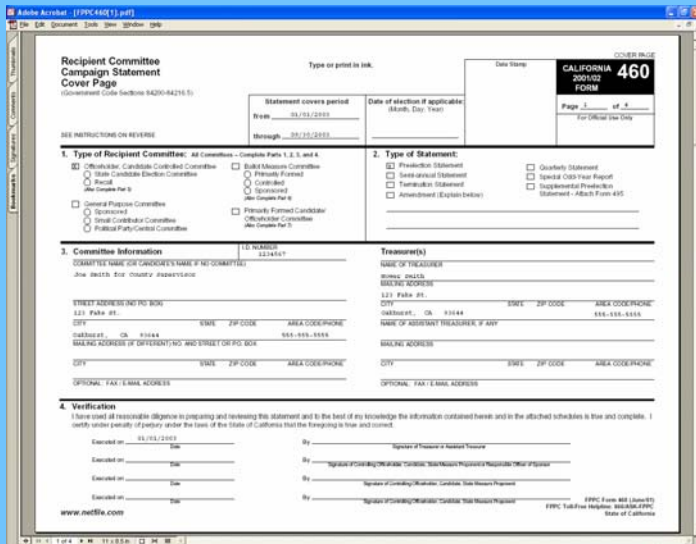

- All committees can be viewed over the internet
- E-filed documents shown over the internet in redacted form
- All e-filed data is searchable over the internet; you can download info into Excel
- You have the option to manually redact paper filed documents for public viewing over the internet

3. *Agency Management Tool*

- The system acts as your repository of filers
- Create the filers in the database just once
- System handles both e-filed and paper filed documents
- Letter generation by system for pre-notification letters, amendment letters, late letters, and fine letters
- Run verification reports
- Easy to use tools to set up new committees and filing calendar
- Makes new staff training easy!

OTHER BENEFITS

Make great looking documents

Web view reduces staff time

- Online viewing of filings through kiosk mode or website reduces staff time and resources used - no more unnecessary copies made!
- Automation yields labor savings

Filing admin made easy

- Reconciliation of submitted documents a snap
- Generate status reports on filings at any given moment
- Instant notification that filing was received
- Internet based service means no updates to fool with

Usable from any computer

- System doesn't care what type of computer the filer is using (PC, Mac, or Linux) as long as they have an internet connection
- For users without computers they can access the internet free at their local library

Continuous updates

- Anytime laws change, system is updated to comply
- Internet based service means no computer updates to fool with
- No additional fees charged for above changes - all included in your quarterly fee.

NetFile is number one in California

- Netfile was California's first internet based accounting, disclosure, and data management system
- Clients account for almost half of all electronic disclosure document filings in the state

Unparalleled training and technical support
