EXTERNAL

I would like to comment regarding 7.5 on the agenda, #20 ARB0121. We are the next door neighboring property on the north at 1342 10th street which is a 3 story apartment and are concerned with the side yard clearance. I want to make sure my tenants on the first and second floor (who face the proposed addition) receive enough light--all of them are long term tenants who have lived there at least 20 to 30 years and are elderly and would be negatively impacted if the building's 2nd floor is too close to the building and blocking the light.

Thank you
