Ordinance for Food Service Containers

As a friendly reminder, beginning February 9, 2007, all city facilities including permitted meetings, room rentals, activities, practices, games, events, concessions, etc., were issued new requirements for the purchase and use of food service containers. On February 9, 2008 all food service providers in Santa Monica were issued the same requirements.

Expanded polystyrene (also known as Styrofoam®) and non-recyclable plastic together make up the largest amount of waste that ends up on Santa Monica's beaches. At the annual Coastal Cleanup Day, 10,000 volunteers came out to clean the beaches and in three hours picked up over 75,000 lbs. of trash, most of which was identified as Styrofoam® and plastic. Polystyrene is made from crude oil and when improperly disposed persists in the environment for hundreds of years.

This plastic waste causes significant environmental damage to the beach and marine environment. It can also harm marine animals and birds who mistake it for food. By banning these types of disposable plastic food containers, the ordinance will help to reduce the amount of these materials that pollute Santa Monica's beaches and the bay.

It's pretty easy – keep the Styrofoam® or clear plastic food service containers, marked with #6, out of all city facilities including park facilities and playing fields. Help the city do its part. If you want some tips or need assistance please visit www.smepd.org/container or contact Josephine Miller of the Environmental Programs Division at 310.458-4925 or josephine.miller@smgov.net.
