

THIS IS A SMART BENCH!

IT PROVIDES FREE, SOLAR-POWERED
USB PHONE AND DEVICE CHARGING.
IT CAN ALSO TELL US HOW BUSY THE PARK IS.

- The bench listens for wi-fi signals from nearby phones.
- These signals are recorded, encrypted and anonymous. No personal information is ever collected.
- The data is never shared with nor sold to third parties.
- The information will be used to measure park activity and improve programs, events and amenities.

The City of Santa Monica has joined dozens of other cities nationwide and globally to make parks smarter by using this technology.
