

Clean Renewable Energy at Competitive Rates!

Clean Power Alliance is Southern California's new locally operated, electricity provider, offering clean renewable energy at competitive rates.

When will service launch?

Service for most commercial customers will begin in May 2019. CPA has been serving municipal and commercial customers in three communities within Los Angeles County since 2018, and began service to all residential customers in our service territory in February 2019.

Who are we?

Clean Power Alliance is a Community Choice Aggregation (CCA) electricity provider, made up of 31 communities in Los Angeles and Ventura Counties. We are a non-profit Joint Powers Authority (JPA), governed by a board of local elected officials representing each of our member agencies. Clean Power Alliance believes in a clean energy future that is local, where communities are empowered and customers are given a choice about the source of their energy.

How does it work?

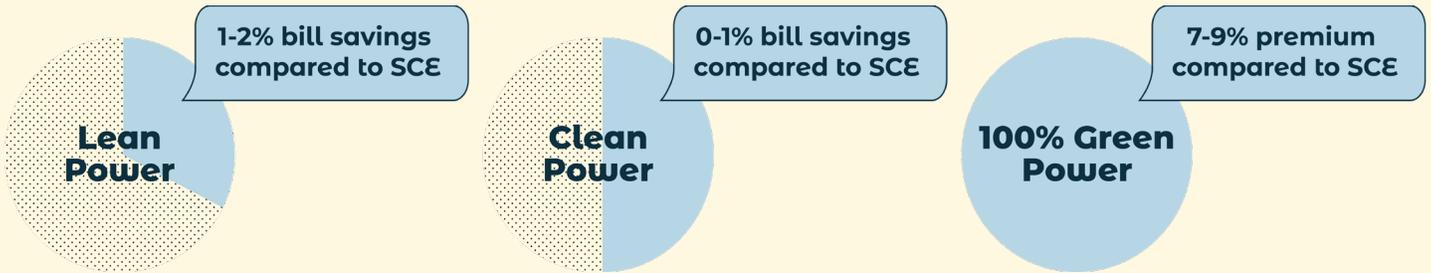

Clean Power Alliance purchases clean power, and Southern California Edison (SCE) delivers that power to your business.

SCE will continue to send your bill and be responsible for resolving any electricity service issues.

The choice is yours!

You will automatically start on the rate plan chosen by your community but you can change your plan at any time with no fees. Whichever you choose, you will enjoy the benefits of competitive rates, cleaner energy, and local management. You also have a choice of who your energy provider is and can opt out and return to SCE. Once you receive an enrollment notice in the mail from us, you can opt up, down, or out on our website or by calling our call center. Being a Clean Power Alliance customer is a simple way to demonstrate your organization's environmental leadership and join us in building a strong economy.

*Your CPA rate structure will mirror your current rate structure with SCE, including the new Time of Use (TOU) periods. You can compare CPA and SCE's rates in our online bill calculator at: www.cleanpoweralliance.org/compare. We can provide your business a customized rate comparison upon request.

What changes and what stays the same?

Stays the same	New
SCE delivery & grid reliability	Competitive pricing
SCE billing	Choice of energy providers
SCE account services	Higher renewable content
SCE rebates & incentives	New green business incentives & programs
Call SCE to start or stop service	Responsive to local priorities
Receive one bill each month	Lower greenhouse gas emissions
