

## BMP O&M Inspection Companies

This is an incomplete list of companies that do or have done post-construction structural BMP inspections in Santa Monica for property owners in the City of Santa Monica Post-Construction Best Management Practices (BMPs) urban runoff reduction Program. This list is compiled based upon feedback from property owners and contact with the City's Watershed Program Coordinator from such companies who do this type of work. The City does not recommend nor endorse any one or group of companies or products.

**NOTE:** the first section is a list of companies that completed a third-party inspection training and certification course in June 2017, with specific training on rainwater systems. While certified by a third-party, obviously the quality of the work can vary, compared to companies that are not certified.

Listed in alphabetical order, no order related to business practices nor outside recommendations. Contact and other types of information is provided, when provided or if known, but may be available on the Internet. Contact information may have changed since compiled.

### **Certified by Third-Party, June 2017\***

- Botham Plumbing & Heating, Jerry Botham, Lic # C36-839118, [bothamplumbing@gmail.com](mailto:bothamplumbing@gmail.com), [www.bothamplumbingandheating.com](http://www.bothamplumbingandheating.com), 310.827.4040
