

This Support Bulletin provides you with some important information about your ProjectDox® software and the latest compatibility with Internet Explorer 10. By adding the site to your trusted sites, changing some internet options and running compatibility mode it enables IE10 to work with ProjectDox.

By following the simple steps in this bulletin you will be able to use ProjectDox in IE10.

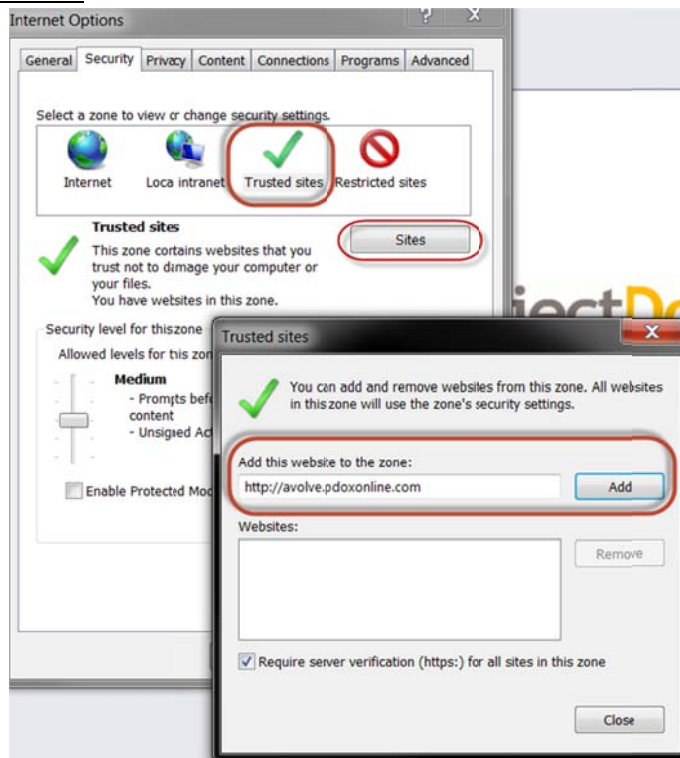

1. Open up Internet Explorer 10.
2. Go to **Tools** and at the bottom of the list select **Internet Options**.

3. Select the **Privacy Tab**. Press the button called **Sites**. Add the ProjectDox website link and click **Allow**.

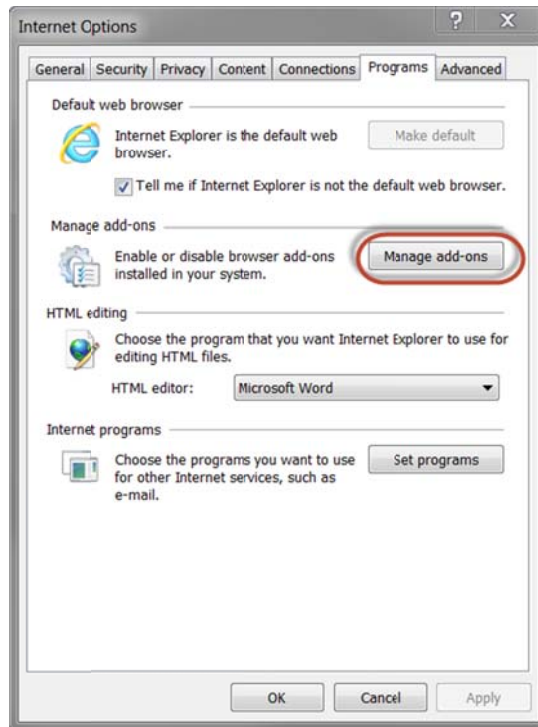

4. Select the **Security Tab**. Select **Trusted Sites** and press the button called **Sites**. Add your ProjectDox website link and click **Add**.

5. Now select the button **Advanced** under the **Privacy Tab**. Select **Override automatic cookie handling**.

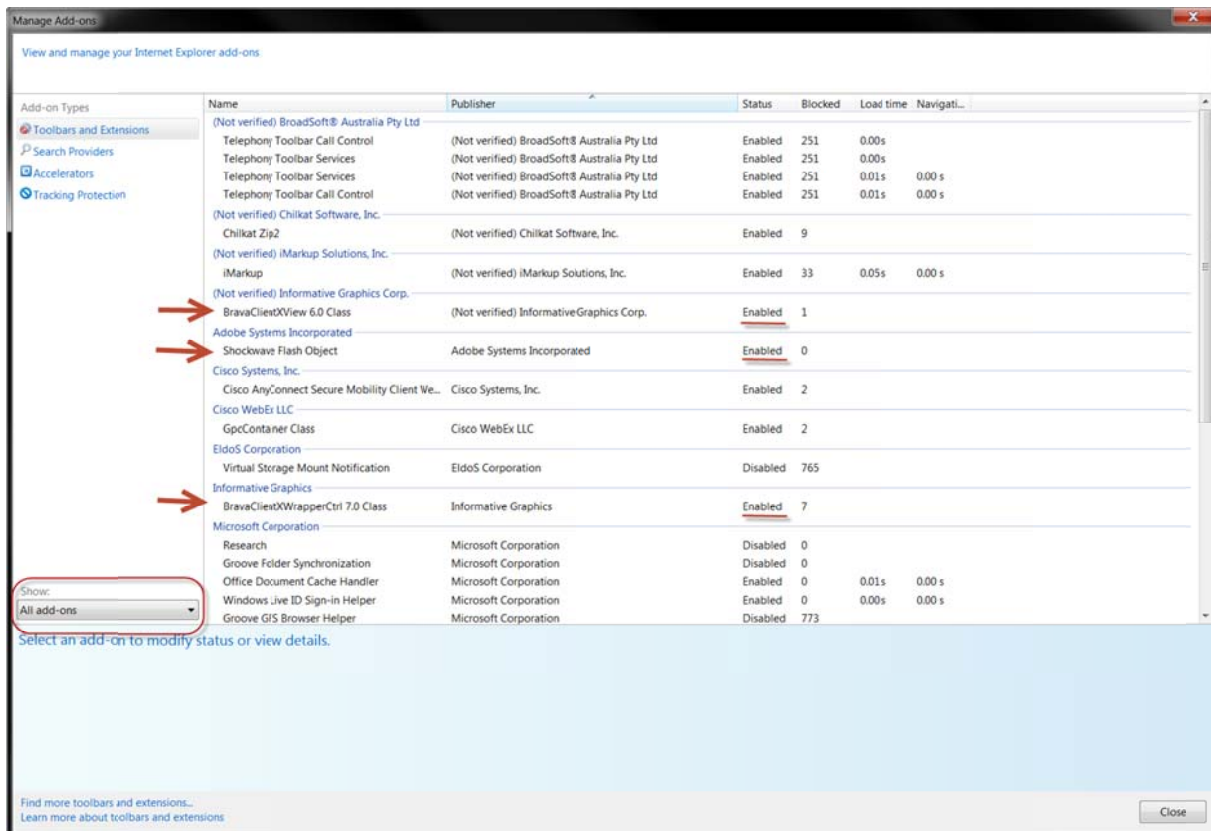

6. Select the **Programs Tab**. Press the button called **Manage add-ons**.

7. Now under **Show:** Select **All add-ons**. On the right there will be all the add-ons. Look into those and verify all of the *Informative Graphics*, *Chilkat Software Inc*, *Persists Software XUpload* and *Microsoft Silverlight* are all enabled.

Note: If the column called status is not visible, right click on a header such as *Publisher* and select *Columns* and finally select *status*.

- Look for **Persits Software XUpload** and click on **more information** on the bottom under Version. Make sure the ProjectDox Site is listed inside the white box. Press the **Close** Button.
